#### **PROJECTS**

## **Login System**

Python, Django, HTML & CSS

- Developed a robust and secure login system using Django, a Python web framework.
- Implemented secure password hashing and salting using Django's built-in authentication system to prevent unauthorized access to user credentials.
- Integrated e-mail OTP verification as an additional security layer, leveraging Django's built-in email sending functionality.
- GitHub: Login System using Django ≥

#### **Portfolio Website**

HTML & CSS

- Created a visually appealing portfolio website utilizing HTML & CSS to showcase my skills and projects.
- The project demonstrates my proficiency in front-end web development and a detail-oriented approach in crafting an impactful online presence.
- Link to Portfolio: iamfaham.github.io/Portfolio-Website @
- GitHub: Portfolio Website ∂

#### **Temperature Converter**

HTML, CSS & JavaScript

- Developed a temperature converter web application, that allows users to convert temperatures between Celsius, Fahrenheit and Kelvin.
- The project aimed to provide a simple and intuitive interface for users to perform temperature conversions efficiently.
- GitHub: Temperature converter ≥

## **CERTIFICATIONS**

Programming in Python COURSERA	<b>Django web Framework</b> COURSERA	Foundations of User Experience (UX) Design COURSERA
Google Cybersecurity COURSERA	React Basics COURSERA	

#### **EDUCATION**

# B.Tech (Computer Science & Engineering) Oriental Institute of Science & Technology CGPA (6th Sem) - 7.6/10

2020 – Present Bhopal

# **TECHNICAL SKILLS**

Languages - (Python, HTML, CSS, JavaScript, SQL)

Tools/Technologies - (Django, ReactJs, Bootstrap, MySQL, VS Code, Git, GitHub, Figma)
